ANAESTHESIA

Jurox

Managing Hypotension

Flowchart

Notes:

This flowchart applies to ASA I or II status patients.
Take care when administering additional fluids in cases with cardiac disease.
This is not intended to be a comprehensive guide. Every patient will have varying requirements and may respond differently to each treatment.

Produced by Jurox Pty Limited in association with Dr Eleanor Drynan BVSc MANZCVS DACVAA

About Think Anaesthesia®

Think Anaesthesia® is an educational platform providing veterinary professionals with both on-demand and live training material, primarily focused on anaesthesia and analgesia. Its aim is to help improve the standards of veterinary anaesthesia and analgesia, while providing a platform for easily accessible CPD.
